TO WHOM IT MAY CONCERN,

Why all U.S. citizen taxpayers should be extremely concerned regarding the final results of this commission is two fold:

1- why their tax dollars should continue to enable, support and finance the largest war machine on planet earth, known as the U.S. political, military, industrial complex and

2- why their loved ones should ever again be subjected to the disability, destruction and death of war via military conscription in the future.

This national commission has been created due to the decline in volunteerism for the uniformed services in recent years and how this problem should be addressed as U.S. Hegemony expands throughout the Middle East, Africa and Asia in the 21st century.

Military, National and Public Service is all about keeping the status quo of war alive and well, for the Architects of War both within government as well as outside of government, who profit from war's continued existence, at the expense of all the innocent civilian men, women and children drawn into war's vortex by rule of law or otherwise. Since 1990 and the first Gulf War, the U.S.A. has been engaged in non stop war and will be continuing on this path through the end of the 21st century.

There is a moral problem here as to why the U.S.A. is a war nation with a war economy and has been such, ever since 1776 and why it's taxpaying citizens are unable to alter or counter this immoral center of American life and culture. Unfortunately, all U.S. citizen taxpayers live

a life of illusion in regards to their relationship to war. There exists not one single citizen taxpayer who has not been rendered to be but a complete and total hypocrite in life as regards this dichotomy of thinking, speaking, and acting for peace, freedom and love on the one hand, while with the other financing, via mandatory tax contributions, the largest war machine on planet earth 24/7, 365 days a year. This is not Democracy. This is tyranny and the abuse of power and what the U.S. government is in reality all about. If you don't pay your taxes, you will be fined, jailed or both for non compliance and so the vicious cycle of U.S. government rule of law goes from decade to decade as not only many nations throughout the world are exploited by the U.S. political, military, industrial complex but the entire U.S. citizen taxpayer population as well become exploited.

There is no sane rationalization or justification as to why any U.S. citizen taxpayer should ever contribute their tax dollars from their hard earned income to the aforementioned lie of war that they are by law forced to comply with. Nor should they ever be forced and coerced to sacrifice their children's lives via mandatory military registration and conscription upon reaching the age of 18. To be coerced into military service, that has absolutely nothing to do with peace, freedom or love but everything to do with providing military muscle around the world when diplomacy doesn't get the desired results wanted.

The U.S. Selective Service System is in reality a criminal institution that thrives and survives upon the deaths of the young for the ideological lies of war that all governments manufacture via nationalism and patriotism. Two very cunning and cleverly put together tools and weapons of war, constructed out of government propaganda and cultural conditioning that all citizens become exposed to from birth to death in their individual journey through life.

Of the 2 million Selective Service Conscripts during the Vietnam War, some 20,000 ended up dead or missing in action. What did they all really die for? Was it peace, freedom or love, or just for the great lie of war? They all died for the great lie of war that had been pumped into their heads by the military during boot camp, that they had all been forced and coerced into, via government rule of law that had taken their lives away from them long before they had ever encountered any North Vietnamese. THIS IS A TRUE CRIME AGAINST ALL OF

HUMANITY, THAT THE NATIONAL COMMISSION IS ATTEMPTING TO ONCE AGAIN SET INTO MOTION FOR THE REMAINDER OF THE 21ST CENTURY. IT'S DIABOLICAL, EVIL AND CRIMINAL AND SHOULD NEVER BE PERMITTED BY HUMAN BEINGS WHO CONSIDER THEMSELVES TO BE HUMAN.

The only real debate before all U.S. citizen taxpayers, is why they permit themselves to be manipulated and abused by a criminal government whose top priority in life is war. This statement is supported by the evidence and fact of approximately 1000 military bases and facilities that the U.S. political, military, industrial complex controls and maintains in over 160 nations worldwide. The U.S. citizen taxpayer is not separate from this phenomenon, they are it and until they begin to disengage from it, they will always be victimized by it and will have nobody to blame but themselves for never having stood up against such a monster.
